

Hy Nguyen (Happy)

Principal DevSecOps & AI Platform Engineer

Ho Chi Minh City, Vietnam · +84 969 149 659 · nguyenhappy92@gmail.com

happynguyen.name.vn · linkedin.com/in/nguyenhappy92 · github.com/nguyenhappy92

Summary

Principal DevSecOps engineer with 9+ years across cloud infrastructure, security, and platform engineering, including 4+ years leading DevOps/DevSecOps teams. I design and operate secure, scalable cloud foundations (Azure Landing Zones, AWS multi-account) and build AI platforms and agents on Amazon Bedrock and Claude with end-to-end MLOps/LLMOps. Strong in Kubernetes, Terraform, CI/CD, and observability, with a security-first, automation-driven approach.

Core Skills

AI & Agents: Amazon Bedrock, Claude (Anthropic API), Amazon Q, LangChain/LangGraph, RAG, MCP, vector search, Cursor, prompt engineering, MLOps/LLMOps

Cloud: Azure, AWS, GCP — Landing Zones, governance, cost optimization

Containers: Kubernetes (AKS/EKS/GKE), Docker, Helm, ArgoCD, Linkerd, NGINX Ingress

IaC & CI/CD: Terraform, Bicep, Ansible, Terraspace; GitHub Actions, Jenkins, Azure DevOps, GitLab CI, TeamCity

Security: ISO 27001, SOC 2, PCI DSS, SAST/DAST, SonarQube, Vault

Observability: Datadog, New Relic, Grafana, Prometheus, Loki, ELK

Data/DB: PostgreSQL, MSSQL, MongoDB, MariaDB, Cosmos DB, Redis, Snowflake

Languages: Python, Go, Bash, TypeScript/JavaScript

Experience

Principal DevSecOps Engineer

Jan 2026 – Present

MoneyForward Vietnam

Ho Chi Minh City

- Own design and delivery of the company AI Platform and Azure foundation used by internal teams to build and run AI agents and automation.
- Built the AI Platform (APIs, standards, MLOps) so teams can onboard and run models and agents with minimal friction.
- Designed and implemented Landing Zones on both Azure and AWS (multi-subscription/ multi-account, governance, policy guardrails) with security baselines meeting company and regulatory standards.
- Designed and implemented an AI Landing Zone on AWS for secure, governed AI/ML workloads, with security baselines, guardrails, and Amazon Bedrock-based services.
- Developed and deployed AI agents on Amazon Bedrock and Claude to automate engineering and product workflows, with a focus on token efficiency and agent security.
- Drive org-wide technical standards for DevSecOps, cloud, and AI infrastructure.

DevSecOps Team Lead

Mar 2021 – Dec 2025

Mercatus

Ho Chi Minh City

- Led a DevSecOps team architecting secure, scalable infrastructure across Azure, AWS, and GCP for enterprise clients (US, Israel, Canada).
- Designed an AI Landing Zone and end-to-end MLOps pipelines for deploying AI agents and chatbots in production.
- Established Azure Landing Zones and AWS foundational environments with ISO 27001 / SOC 2 compliance and automated governance.
- Built highly available AKS/EKS clusters (Linkerd, NGINX Ingress) with Grafana/ELK/ Prometheus/Loki/New Relic observability for production reliability.
- Automated provisioning (Terraform/Ansible) and CI/CD (GitHub Actions, Jenkins, ArgoCD, Azure DevOps, SonarQube) to accelerate and standardize delivery.
- Delivered data engineering (Azure Data Factory, Snowflake/Snowpipe/Snowpark) and BI (Power BI, Sigma) for data-driven decisions.

DevOps Lead

Jun 2019 – Mar 2021

FINVIET — ECO E-wallet

Ho Chi Minh City

- Led a cross-functional DevOps team building the ECO e-wallet payment platform across private cloud and AWS/GCP with full DC/DR.

- Built CI/CD pipelines (GitLab, Jenkins, TeamCity, GitHub Actions, ArgoCD) and IaC with Terraspace/Ansible.
- Designed HA databases (MongoDB Cluster, MariaDB Galera, Oracle Data Guard/RAC) and monitoring (PRTG, Nagios, Grafana, Prometheus) for predictive alerting.
- Operated enterprise firewalls (FortiGate 500E, Sophos XG, pfSense) and VMware vSphere/Horizon VDI; applied ISO 27001 and IPS/IDS controls.

System Administrator

Mar 2016 – Jun 2019

123HOST (Digital Storage Co.)

Ho Chi Minh City

- Managed hosting, domains, VPS, and dedicated servers (cPanel/Plesk/DirectAdmin) on Windows and Linux for a large customer base.
- Deployed dedicated servers (Dell R610/R730, HP ProLiant) at Viettel/VNPT datacenters; built monitoring with Cacti/Zabbix/Nagios/Grafana.

Selected Projects

- **Happy Agent — AI Coworker & Marketplace:** AI coworker tool and agent that installs as a plugin into existing workflows, with improved token efficiency and hardened agent security (scoped permissions, safe tool execution, guardrails), plus a marketplace to discover and install agents/plugins.
- **AI Landing Zone on AWS:** Secure, governed foundation for AI/ML workloads and agents — multi-account guardrails, security baselines, MLOps, and Amazon Bedrock.
- **Azure/AWS Landing Zone Migration (Mercatus):** Centralized RelationShop, Self-Point, and Mercatus systems onto Azure/AWS/GCP with cost and architecture optimization. Team of 12; role: DevSecOps Lead.
- **Salescore (Blockchain):** Coin/point management on AWS (EKS, Solidity, Web3.js) with IaC and ISO/SOC 2 compliance.

Certifications

- Microsoft Certified: Azure Solutions Architect Expert
- Microsoft Certified: Azure Administrator Associate; Azure Developer Associate
- AWS Certified Solutions Architect – Associate
- CCNA · LPIC-1 & LPIC-2 · IELTS 6.5

Education

B.Eng. Computer Networks

Aug 2012 – Aug 2016

HCMC University of Technology and Education

Ho Chi Minh City
